PCB’S in Lake Michigan Fish

Polychlorinated biphenyls (PCB's) accumulate in the fat of fish living in waters which have received discharges or fallout from the air containing PCB's. Low fat species, such as yellow perch, smelt and chubs, do not accumulate PCB's to the same extent as the larger fish of the high fat species including trout and salmon. The Illinois Department of Public Health has advised that Lake Michigan salmon and trout may be contaminated with PCB's levels that exceed standards set by the U.S. Food and Drug Administration. The Department of Public Health has advised that fish consumers refrain from eating "coho salmon, chinook salmon, lake, rainbow and brown trout more than one meal per week of these species if these fish weigh seven (7) pounds or more." Fish that weigh less than seven pounds may be eaten safely. Also, women who are or could become pregnant, adolescent girls, nursing mothers and preschool-age children should eat none of above mentioned fish which weigh seven pounds or more.

Levels of PCB's can be reduced by removing the skin and all fatty portions of the fish along the back, side and belly. Barbecuing, broiling or any other cooking method which removes additional oils and fats should be utilized when preparing fish that may contain excessive levels of PCB's.

AREAS OPEN TO SNAGGING

- Snagging for chinook and coho salmon only is permitted from the following Lake Michigan shoreline areas from September 16 through December 31; however, no snagging is allowed at any time within 200 feet of a moored watercraft or as otherwise posted:
- (1) Lincoln Park Lagoon from the Fullerton Avenue Bridge to the southern end of the Lagoon.
 - (2) Waukegan Harbor
 - (3) Discharge channel and bay area formed by the landfill at Northwestern University, Evanston (not in Lagoon).
 - (4) Winnetka Power Plant discharge area and the Waukegan Power Plant discharge area.
 - (5) Jackson Harbor (inner and outer harbors).

FISHING GUIDE TO COOK COUNTY FOREST PRESERVE WATERS

This guide lists Cook County forest preserve waters open to public fishing, and also the location, size, depth and principal kinds of fish in each water area. Where available, public transportation is also noted.

Depth contour maps of many lakes in the Forest Preserve District have been completed and are available upon request from: Cook County Forest Preserve District, Conservation Department, 536 N. Harlem Ave., River Forest, Illinois 60305. Others are being worked on. We hope to have all of the major water areas mapped in 3 or 4 years.

FISHING REGULATIONS

The Cook County Forest Preserve District works closely with the Illinois Department of Conservation in managing these waters for hook and line fishing. With one major exception, State rules and regulations hold true for fishing in the preserves. The exception: **Bow and arrow fishing for rough fish is not permitted in the preserves.** All waters in the forest preserves are designated fish preserves. Fishermen are limited to two lines with no more than two hooks per line and no trolley lines.

Special regulations regarding bag and size limits imposed on designated waters will be posted at the waters.

A valid Illinois hook and line fishing license is required except for persons that are under 16, disabled or blind, or over 65 years of age. In addition, anyone required to have a valid fishing license must have a State trout and salmon stamp when fishing for trout within the Forest Preserve District trout lakes.

Daily limits, length limits and closed seasons have been removed from all fish found in forest preserve waters, with three exceptions. These are: **no more than 6 largemouth bass or smallmouth bass, regardless of size, may be taken in one day; no more than 3 northern pike may be taken in one day (and these must be 24 inches long or longer); and no more than 5 trout may be taken in one day.** Use of minnow seine is not allowed except in the Des Plaines River for bait collecting.

Special Forest Preserve Regulations regarding size limits on bass will be imposed on designated waters of the District and these special rules will be so posted. These experimental regulations are to prevent the excessive removal of bass, and to improve the fishing thru protection of our major predator fish. We ask the fishing public to

respect and obey these regulations on lakes so posted.

Ice Fishing is permitted on designated forest preserve lakes during winter months when the ice has become 4 or more inches thick. Public announcements are made in the news media when conditions permit such fishing and which lakes are open during each year.

ILLEGAL ACTIONS

It is unlawful to release any fish (including minnows or goldfish) in any Cook County waters, except in the Waters from which they were taken, without having first secured permission from the Conservation Department of the Cook County Forest Preserve District.

It is illegal to abandon, deposit or throw any wire, can, bottle, glass, paper, trash, rubbish, cardboard boxes, wood cartons, trees, parts of trees, brush or other insoluble material (including animal or vegetable material) into the waters or on the ice of any waters of the County.
